

Maintenance Millwright - CNC Equipment

Description

Summary

The **Maintenance Millwright - CNC Equipment** is responsible for troubleshooting, repairing, and maintaining CNC machines, manual machines, and related production equipment. This role also supports preventative maintenance, machine installations, facility maintenance, contractor coordination, and maintenance documentation.

The ideal candidate is organized, safety-focused, mechanically skilled, self-motivated and self-driven and able to respond quickly when equipment issues affect production.

Duties

Responsibilities

- Troubleshoot, repair, and maintain CNC machinery, manual machines, and related equipment
- Complete planned and preventative maintenance activities
- Respond with urgency to machine-down situations
- Install, repair, modify, and maintain production equipment and work cells
- Use machine manuals, technical documents, schematics, and vendor resources to diagnose equipment issues
- Identify, source, and replace parts as required

Closing Date

July 31, 2026
